SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier
Name of the substance: p-Toluenesulphonyl Isocyanate
Identification number: 615-012-00-7 (Index number)
Registration number: 01-211980050-47-0000, 01-211980050-47-0001
Synonyms: 4-methylbenzenesulfonyl isocyanate * p-toluenesulphonyl isocyanate
Issue date: 09-October-2013
Version number: 03
Revision date: 03-April-2019
Supersedes date: 01-February-2017

1.2. Relevant identified uses of the substance or mixture and uses advised against
Identified uses: Industrial chemical. A complete list of registered uses for this product can be found in the table of content of the exposure scenario for communication, available as an annex to the eSDS.
Uses advised against: None known.

1.3. Details of the supplier of the safety data sheet
Supplier: VanDeMark Chemical Inc. BV
Address: Lichtenauerlaan 102-120
Rotterdam
3062 ME
Netherlands
E-mail: sales@vdmchemical.com
Manufacturer: VanDeMark Chemical Inc.
Address: 1 North Transit Road, Lockport, NY 14094 USA
Telephone: +1 716-433-6764
E-mail: sales@vdmchemical.com

1.4. Emergency telephone number
Europe: 112

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture
The substance has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards
- Skin corrosion/irritation: Category 2
- Serious eye damage/eye irritation: Category 2
- Respiratory sensitisation: Category 1
- Specific target organ toxicity - single exposure: Category 3 respiratory tract irritation

Hazard summary: Reacts violently with water. Irritating to eyes, respiratory system and skin. May cause sensitisation by inhalation. Occupational exposure to the substance or mixture may cause adverse health effects.

2.2. Label elements
Label according to Regulation (EC) No. 1272/2008 as amended
Contains: Tosyl isocyanate
Hazard pictograms: 

H315 - Causes skin irritation.
H319 - Causes serious eye irritation.
H334 - May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H335 - May cause respiratory irritation.
Signal word: Danger

Hazard statements:
- H315: Causes skin irritation.
- H319: Causes serious eye irritation.
- H334: May cause allergy or asthma symptoms or breathing difficulties if inhaled.
- H335: May cause respiratory irritation.

Precautionary statements:
Prevention:
- P264: Wash thoroughly after handling.
- P280: Wear protective gloves and eye/face protection.

Response:
- P304 + P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing.
- P305 + P351 + P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- P342 + P311: If experiencing respiratory symptoms: Call a POISON CENTRE/doctor.

Storage:
- P403 + P233: Store in a well-ventilated place. Keep container tightly closed.

Disposal:
- P501: Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information:
- EUH014 - Reacts violently with water.

2.3. Other hazards:
This substance does not meet vPvB / PBT criteria of Regulation (EC) No 1907/2006, Annex XIII.

SECTION 3: Composition/information on ingredients

List of abbreviations and symbols that may be used above:
- #: This substance has been assigned Union workplace exposure limit(s).

Composition comments:
The full text for all H-statements is displayed in section 16.
All concentrations are in percent by weight unless otherwise indicated.
Occupational Exposure Limits for impurities are listed in Section 8.

SECTION 4: First aid measures

General information:
If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance.

4.1. Description of first aid measures

Inhalation:
Remove victim to fresh air. If breathing is difficult, give oxygen. Get medical attention.

Skin contact:
Immediately remove contaminated clothing and shoes and wash skin with soap and plenty of water. Get medical attention if irritation develops or persists.

Eye contact:
Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Get medical attention if irritation develops or persists.

Ingestion:
Have victim rinse mouth thoroughly with water. Never give anything by mouth to a victim who is unconscious or is having convulsions. Do not induce vomiting without advice from poison control center. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. Get medical attention if any discomfort occurs.

4.2. Most important symptoms and effects, both acute and delayed
Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. May cause respiratory irritation. Shortness of breath. Wheezing. Skin irritation. May cause redness and pain. Headaches, nausea and vomiting.

4.3. Indication of any immediate medical attention and special treatment needed
Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

p-Toluenesulphonyl Isocyanate  
907468  Version #: 03  Revision date: 03-April-2019  Issue date: 09-October-2013

SDS UK  
2 / 8
SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media: Carbon dioxide (CO2). Dry powder. Dry sand.

Unsuitable extinguishing media: Do not use water.

5.2. Special hazards arising from the substance or mixture

In case of fire, toxic and corrosive gases may be formed. Reacts with water and emits carbon dioxide gas. Combustion products may include: carbon oxides, nitrogen oxides, sulfur oxides, hydrogen cyanide.

5.3. Advice for firefighters

Self-contained breathing apparatus and full protective clothing must be worn in case of fire. Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace.

Special protective equipment for firefighters: Move containers from fire area if you can do it without risk. Use water spray to cool unopened containers. Do not get water inside container or in contact with the material.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Avoid inhalation of vapours and contact with skin and eyes. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained.

For non-emergency personnel: Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

For emergency responders: Do not discharge into drains, water courses or onto the ground. Prevent further leakage or spillage if safe to do so. Environmental manager must be informed of all major spillages.

6.2. Environmental precautions

DO NOT GET WATER on spilled material or inside containers. Reacts with water and emits carbon dioxide gas. Do not close container tightly. Risk of excess pressure build-up.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labelled container.

6.3. Methods and material for containment and cleaning up

For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

6.4. Reference to other sections

For non-emergency personnel: Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

For emergency responders: Do not discharge into drains, water courses or onto the ground. Prevent further leakage or spillage if safe to do so. Environmental manager must be informed of all major spillages.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Keep away from heat and sources of ignition. Use only with adequate ventilation. Avoid inhalation of vapours and contact with skin and eyes. Avoid prolonged exposure. Wear appropriate personal protective equipment. Observe good industrial hygiene practices. Keep the workplace clean. Technical aids: Use disposable equipment (rags, brushes, spatulas, putty knives, etc.), if possible. Material may react violently with water.

7.2. Conditions for safe storage, including any incompatibilities

Store locked up. Store in a well-ventilated place. Store away from incompatible materials (see Section 10 of the SDS). Store in tightly closed original container in a dry and cool place. Store in a cool place below 170°F (77°C).

7.3. Specific end use(s)

Industrial chemical.

SECTION 8: Exposure controls/personal protection

**Exposure guidelines**
UK EH40 WEL: Skin designation
Chlorobenzene (CAS 108-90-7) Can be absorbed through the skin.

**8.2. Exposure controls**

**Appropriate engineering controls**
Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. An eye wash and safety shower must be available in the immediate work area.

**Individual protection measures, such as personal protective equipment**

**General information**
Use personal protective equipment as required. Personal protective equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

**Eye/face protection**
Use chemical goggles / face shield. Eye wash station should be located in immediate work area.

**Skin protection**
- **Hand protection**
Wear appropriate chemical resistant gloves. Suitable gloves can be recommended by the glove supplier. Chemical resistant protective gloves consistent with Standard EN 374 Suitable materials with prolonged, direct contact (Recommended: Protective index 6, corresponding > 480 minutes of permeation time according to EN 374):

- Neoprene - 0.6 mm coating thickness.

Notice: The selection of a specific glove for an application and duration of use in a workplace should also take in to account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection) potential body reactions to the glove material as well as instructions/specifications provided by the glove manufacturer.
Wear appropriate chemical resistant clothing. Selection of specific items such as face shield, boots, apron, or full body suit will depend on task and potential for exposure. Polyethylene coatings of 10 mils provide a barrier for splash protection. Safety shower should be located in the immediate work area. Remove contaminated clothing immediately, wash skin area with soap and water. Launder clothing before reuse.

Respiratory protection
Respiratory protections should be worn when there is a potential to exceed the exposure limit requirements or guidelines. When respiratory protection is required, use an approved cartridge for organic vapors with particulate filtration properties (A2-P2 for concentration up to 5,000 ppm, air powered A3-P3 for concentration up to 10,000 ppm). In higher concentrations or in case of insufficient data on concentration wear a positive-pressure supplied-air respirator.

Thermal hazards
When material is heated, wear gloves to protect against thermal burns.

Hygiene measures
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Private clothes and working clothes should be kept separately.

Environmental exposure controls
Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. Fume scrubbers, filters or engineering modifications to the process equipment may be necessary to reduce emissions to acceptable levels.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance
- Physical state: Liquid.
- Form: Liquid.
- Colour: Colourless.

Odour
- Acrid.

Odour threshold
- Not available.

pH
- Not available.

Melting point/freezing point
- -2.37 °C (27.73 °F) (101.3 kPa) / -2 °C (28.4 °F)

Initial boiling point and boiling range
- Not available.

Flash point
- 146.0 °C (294.8 °F) (1013 hPa)

Evaporation rate
- Not available.

Flammability (solid, gas)
- Not applicable.

Upper/lower flammability or explosive limits
- Flammability limit - lower (%): Not available.
- Flammability limit - upper (%): Not available.

Vapour pressure
- 0.025 Pa, 25 °C

Vapour density
- Heavier than Air.

Relative density
- 1.295 (20 °C (68 °F))

Solubility(ies)
- Reacts with water.

Partition coefficient (n-octanol/water)
- 0.6 (30 °C (86 °F))

Auto-ignition temperature
- 551 °C (1023.8 °F)

Decomposition temperature
- Not available.

Viscosity
- 5.16 mPa·s (20 °C (68 °F))

Explosive properties
- Not explosive.

Oxidising properties
- Not oxidising.

9.2. Other information

Molecular formula
- C8H7NO3S

Molecular weight
- 197.21 g/mol

SECTION 10: Stability and reactivity

10.1. Reactivity
- Water reactive material.

10.2. Chemical stability
- Stable in sealed containers.

10.3. Possibility of hazardous reactions
- Reacts with water and emits carbon dioxide gas.
10.4. Conditions to avoid
Water, moisture. Heat may cause the containers to explode.

10.5. Incompatible materials

10.6. Hazardous decomposition products
No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information
Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation
May cause respiratory irritation. May cause allergic respiratory reaction.

Skin contact
Causes skin irritation.

Eye contact
Causes serious eye irritation.

Ingestion
Ingestion may cause irritation and malaise.

Symptoms
Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. May cause respiratory irritation. Shortness of breath. Wheezing. Skin irritation. May cause redness and pain. Headaches, nausea and vomiting.

11.1. Information on toxicological effects

Acute toxicity
Not expected to be acutely toxic.

Skin corrosion/irritation
Causes skin irritation.

Serious eye damage/eye irritation
Causes serious eye irritation.

Respiratory sensitisation
May cause allergy or asthma symptoms or breathing difficulties if inhaled.

Skin sensitisation
Due to partial or complete lack of data the classification is not possible.

Germ cell mutagenicity
Due to partial or complete lack of data the classification is not possible.

Carcinogenicity
Due to partial or complete lack of data the classification is not possible.

Reproductive toxicity
Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure
May cause respiratory irritation.

Specific target organ toxicity - repeated exposure
Due to partial or complete lack of data the classification is not possible.

Aspiration hazard
Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information
The product is a substance.

Other information
No data available.

SECTION 12: Ecological information

12.1. Toxicity
The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

12.2. Persistence and degradability
The product reacts with water to form a solid insoluble reaction product which is non-degradable, according to information available.

12.3. Bioaccumulative potential
The product is not expected to bioaccumulate.

12.4. Mobility in soil
Water reactive material.

12.5. Results of PBT and vPvB assessment
This substance does not meet vPvB / PBT criteria of Regulation (EC) No 1907/2006, Annex XIII.

12.6. Other adverse effects
None known.

SECTION 13: Disposal considerations

13.1. Waste treatment methods
Residual waste
Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner. Do not discharge into drains, water courses or onto the ground.

Contaminated packaging
Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers retain product residue, follow label warnings even after container is emptied. Do not get water inside containers.

EU waste code
08 05 01*
The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information
Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not discharge into drains, water courses or onto the ground. Disposal recommendations are based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

SECTION 14: Transport information

ADR
14.1. - 14.6.: Not regulated as dangerous goods.

RID
14.1. - 14.6.: Not regulated as dangerous goods.

ADN
14.1. - 14.6.: Not regulated as dangerous goods.

IATA
14.1. - 14.6.: Not regulated as dangerous goods.

IMDG
14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations
- Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended
Not listed.
Not listed.
- Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended
Not listed.
- Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended
Not listed.
- Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended
Not listed.
- Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended
Not listed.
Not listed.
- Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA
Not listed.

Authorisations
- Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended
Not listed.

Restrictions on use
- Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended
Not listed.
- Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended
Not listed.

Other EU regulations
- Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended
  Chlorobenzene (CAS 108-90-7)
  Tosyl isocyanate (CAS 4083-64-1)
The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended. Young people under 18 years old are not allowed to work with this product according to EU Directive 94/33/EC on the protection of young people at work.

Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.

For this substance a chemical safety assessment has been carried out.

SECTION 16: Other information

List of abbreviations

ADN: European Agreement Concerning the International Carriage of Dangerous Goods by Inland Waterways.
ADR: European Agreement Concerning the International Carriage of Dangerous Goods by Road.
CAS: Chemical Abstract Service.
CEN: European Committee for Standardization (Comité Européen de Normalisation).
ECHA: European Chemical Agency.
IATA: International Air Transport Association.
IBC: Intermediate Bulk Container.
IMDG: International Maritime Dangerous Goods.
PBT: Persistent, bioaccumulative, toxic.
RID: Regulations concerning the International Carriage of Dangerous Goods by Rail.
STEL: Short-Term Exposure Limit.
TWA: Time Weighed Average.
vPvB: very Persistent, very Bioaccumulative.

Chemical safety report.

The mixture is classified based on test data for physical hazards. The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available. For details, refer to Sections 9, 11 and 12.

H315 Causes skin irritation.
H319 Causes serious eye irritation.
H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H335 May cause respiratory irritation.

Follow training instructions when handling this material.

This information is provided without warranty. The information is believed to be correct. This information should be used to make an independent determination of the methods to safeguard workers and the environment.
